

Protect Small Business.

Time to get real server reliability and data protection with the Intel® Xeon® Processor E3-1200 Product Family.

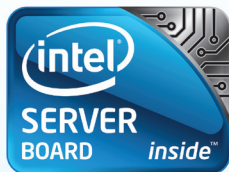

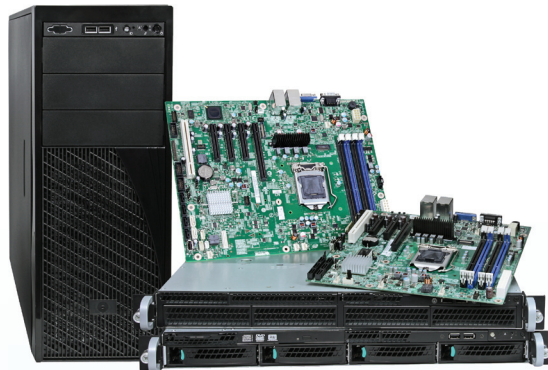

intel.com/xeon

Intel® Xeon® Processor E3-1200 Product Family delivers 30% more performance than previous generation UP processors from Intel.

- **Business Protection:** Safeguard data with business-class servers that are designed and validated to operate 24/7, and include advanced security features.
- **Smart Investment:** Invest wisely, and operate business-class applications and operating systems, while obtaining error correcting memory and redundant storage capabilities.
- **Increase Business Responsiveness:** Intel® Xeon® Processor E3-1200 Product Family-based servers adapt to spikes in your workload to supply more computing power so you can respond to customers faster.

The Intel® Xeon® Processor E3-1200 Product Family is at the heart of this new platform. But the platform doesn't stop at the processor; it encompasses the following:

Intel® Server Entry Board S1200BT Family

The perfect server boards to transition small business to a Real Server.

Intel® Server System R1304BT Family

Deploy a real 1U rack chassis that is tested to work with Intel® Xeon® Processor E3-1200 Product Family – compatible components.

Intel® Server Chassis P4304 Family

Build your server in a pedestal layout that has been validated to work with the Intel® Xeon® Processor E3-1200 Product Family.

Performance results are based on certain tests measured on specific computer systems. For more information go to: www.intel.com/performance
